

Please note when entering production sites on a guided tour:

We do a lot for the safety of people and the environment. Please read the following information carefully for your own safety and act accordingly, even if you are only on our premises for a short time.

Safety does not tolerate compromises!

Use the sidewalks and crosswalks.

Wear the safety vests provided by us.

Wear the prescribed protective equipment. You can obtain the necessary equipment from your contact person if required.

The rules of the German traffic regulations apply on site. The maximum speed is **10 km/h**. During operations with blue lights and sirens, all emergency vehicles have priority.

Smoking is strictly prohibited on site. Rooms in which smoking is permitted are specially marked.

Photography and filming are generally prohibited; exceptions require special permission.

There is an absolute ban on alcohol on site. Carrying alcohol is also prohibited.

Do not step under suspended loads.

Keep a safe distance from machinery and equipment.

Operating areas with potentially explosive atmospheres are marked with "EX". In these marked areas, the carrying and use of non-Ex-protected devices is prohibited (e.g. cell phones, smartwatches, fitness bracelets, hearing aids, lighters, etc.).

SAFETY ON SITE

FOR GUESTS

A guide for a safe stay on our company premises in Siershahn.

Information about the company

Founded in 1908, the Steuler Group is now one of the world's leading specialists for industrial linings and equipment engineering. Sustainable workmanship, innovative technologies and over 2,200 team players with years of expertise at 20 international locations are the guarantors of the Steuler Group's success.

Brief information about the location

From the Westerwald to the whole world. With around 570 employees, the site in Siershahn is the Steuler Group's largest site in the Westerwald. The management, administration and sales departments of the Lining division are based here, as are the Lining Systems, Rubber Linings, Workshop Rubber Linings and Assembly departments. One of the largest autoclaves in Europe has been in operation on the extensive site since 2019.

We would like to guide you safely through our factory site. To enable us to do this, a number of safety rules must be strictly observed. Please familiarize yourself with the listed rules and instructions and support us by acting prudently.

We wish you a **safe stay**.

Siershahn

Check-in and check-out

When entering and leaving the company premises, please get in contact with our staff at the reception (**Building 100**).

Trained first aiders and defibrillators are available on site. In an emergency, speak to someone, the nearest first aider will call the emergency number. The defibrillator is available for collection at the reception (**Building 100**).

Landline

Emergency call 0-112

Reception 211

Mobile

Emergency call 112

Reception (02623) 600-211

In the event of an alarm, leave the building via the **marked escape routes** without using elevators and go to the **nearest assembly point**.
